

## Created by Bintintan Andrei, Interpid Team

## **Description**

This method allows printing of  $\langle TAG \rangle$  formatted text with line breaks. They can be automatic (as soon as the text reaches the right border of the cell) or explicit (via the \n character).

## **Features:**

- Text can be aligned, centered or justified
- Different Font, Sizes, Styles, Colors can be used
- The cell block can be framed and the background painted
- Links can be used in any tag
- **TAB** spaces (\t) can be used
- Variable Y relative positions can be used for subscript or subscript
- Cell padding (left, right, top, bottom)
- Controlled Tag Sizes can be used

Paragraph Example: - Paragraph 1

- Paragraph 2

- Paragraph 2

Sample text - Paragraph 3

Sample text - Paragraph 1

- Paragraph 2

## **Observations:**

- If no **TAG** is specified then the FPDF current settings(font, style, size, color) are used
- The *ttags* tag name is reserved for the TAB SPACES
